COVER

- Title: PropertyOS
 - Subtitle: Singapore's AI-Powered Property Intelligence & Operating System
 - Tagline: "From Data to Decisions — Your AI Property CFO"
 - Bottom line: Seed Round — SGD 500,000 | SMU IIE BIG Grant Application 2026
 - Logo placeholder: stylised building + circuit/AI motif

COMPANY PURPOSE

- Headline: One sentence
 - "PropertyOS is the AI operating system that transforms fragmented Singapore property data into autonomous investment intelligence — helping investors, landlords, agents, and wealth managers make faster, smarter, and more profitable property decisions."
- Three pillars below (icons + labels):
 - - Intelligence: Real-time analytics on 2M+ transactions
 - - Automation: 10 specialised AI agents working 24/7
 - - Revenue: Referral network across mortgage, legal, renovation

PROBLEM

- **Headline:** "Singapore property investors are flying blind in a SGD 1M+ decision"
- **Three pain columns:**
 - **INVESTORS & UPGRADERS**
 - - Spend 50+ hours researching a single purchase
 - - No single platform for yield, value, ABSD, loan, CPF combined
 - - Agents have conflicts of interest
 - - Miss refi windows — costs SGD 8-15K/year
 - **PROPERTY AGENTS (30,000+ in SG)**
 - - Spend 3-4 hours manually creating Comparative Market Analysis
 - - No AI-powered client presentation tools
 - - Lead generation costs SGD 50-500 per lead (PropertyGuru)
 - - No integrated CRM + compliance tracking
 - **WEALTH MANAGERS**
 - - No tool consolidates property + equities + CPF
 - - Manual spreadsheets for HNW client property portfolios
 - - Can't benchmark property vs. REIT performance
- **Bottom quote:** "The average Singapore property transaction is SGD 1.4M. Yet investors make decisions with less data than they use to buy a SGD 2,000 laptop."

SOLUTION

- Headline: "PropertyOS: 10 AI Agents. One Platform. Complete Property Intelligence."
- Left side — Product sits between:
 - [Raw Data: URA / HDB / MAS / Master Plan / News APIs]
 - ↓
 - [PropertyOS AI Agent Layer]
 - ↓
 - [Users: Investors / Agents / Wealth Managers]
- Right side — 5 core agents (with icons):
 - 🔍 ValuationAgent — Fair value vs. transacted price
 - 📈 DealHunterAgent — Flags below-market & distressed opportunities
 - 💰 MortgageAgent — Compares banks, alerts on refi windows
 - 🇸🇬 WealthAgent — Portfolio NW tracking + CPF projection + Insurance requirements review
 - 📰 NewsIntelAgent — Sentiment scoring from The Edge SG, BT, CNA property news
- Use cases callout box:
 - "Is this Bishan condo undervalued?" → Agent analyses 200 recent transactions, scores 87/100 value
 - "Should I refinance now?" → Mortgage agent compares 8 banks, calculates savings SGD 11,200/year
 - "Which district for rental yield?" → Yield agent ranks all 28 districts with 5-year trend
 -

WHY NOW

- Headline: "3 converging forces make this the right moment"
- Timeline visual from 2015 to 2026:
 - 2015-2019: URA/HDB digitise transaction data → foundation laid
 - 2020-2022: Singapore property prices +30% → investor urgency surges
 - 2023: ChatGPT proves AI agents viable for complex reasoning
 - 2024: Claude, Gemini — multi-agent orchestration mature and affordable
 - 2025: Singapore AI Strategy 2.0 — government backing for AI in finance/proptech
 - 2026 NOW: Agentic AI + free government APIs + SGD 35B property market = perfect window
- **Three trend boxes:**
 - TREND 1 — Government Data Opens Up
 - URA API, HDB data.gov.sg, OneMap — 2M+ free transactions available via API. No data moat needed to start.
- **TREND 2 — LLM Costs Collapsed**
 - Cost to run AI property analysis: 2022 = prohibitive. 2026 = SGD 0.003 per query with Gemini Flash. Unit economics now work.
- **TREND 3 — Post-Cooling-Measure Anxiety**
 - ABSD at 20-60% for foreigners/investors. Every buyer needs tools to model scenarios. Complexity = opportunity.

MARKET SIZE

- Headline: "SGD 35B annual transactions. Underserved by modern AI tools."
- **Three concentric circles:**
 - TAM — Total Addressable Market: SGD 890M
 - - 1.4M private residential units in Singapore
 - - 400,000 property investors / landlords
 - - 30,000 CEA-licensed agents
 - - 5,000 IFAs and wealth managers
 - - SGD 200B+ mortgage market
 - - At SGD 99-999/month across segments + referral commissions
- **SAM — Serviceable Addressable Market: SGD 180M**
 - - Digitally-active investors (est. 120,000)
 - - Tech-forward agents (est. 8,000)
 - - IFAs using digital tools (est. 2,000)
 - - Mortgage referral market for online leads
- **SOM — Serviceable Obtainable Market (3 Years): SGD 15M**
 - - Year 1: 300 paying subscribers + 50 mortgage referrals = SGD 420K ARR
 - - Year 2: 1,500 subscribers + agent tier + referral network = SGD 2.1M ARR
 - - Year 3: 4,000 subscribers + B2B agency licenses + ASEAN pilot = SGD 8M ARR
- Bottom note: ASEAN expansion (Malaysia, Thailand, Vietnam) = 10x TAM by 2028

COMPETITION

• Headline: "No one owns the AI-native property intelligence layer in Singapore"

• Competitive matrix (table):

Platform	Property Data	AI Agents	Portfolio Tracking	Mortgage	Agent Tools	Price
PropertyOS	✓	✓	✓	✓	✓	SGD 99-999/mo
PropertyGuru	✓ Listings only	✗	✗	Partial	Partial	Lead fees
99.co	✓ Listings only	✗	✗	✗	✗	Lead fees
SRX/EdgeProp	✓ Analytics	✗	✗	✗	✗	SGD 200+/mo
Spreadsheets	Manual	✗	Manual	Manual	✗	Free
Bloomberg	✗ No property	Partial	✗	✗	✗	SGD 3,000/mo

• Our Moat — 5 unfair advantages:

- 1. NEWS INTELLIGENCE: Only platform feeding The Edge SG, Business Times, CNA property news into AI sentiment scoring
- 2. AGENT NETWORK EFFECT: As agents bring clients, client data enriches the platform
- 3. TRANSACTION REFERRAL FLYWHEEL: Mortgage → legal → renovation → insurance commissions fund data acquisition
- 4. USER DATA LOCK-IN: Portfolio data input creates high switching cost (85%+ retention expected)
- 5. TIMING: 18-month head start before PropertyGuru or banks can build equivalent

PRODUCT

- **Headline:** "Built in phases. Defensible from Day 1."
- **Product line-up (4 tiers):**
 - **STARTER — Free**
 - - ABSD / BSD calculator
 - - District rental yield table
 - - HDB resale price lookup
 - - Telegram deal alerts (3/week)
 - Purpose: Funnel acquisition
 - **INVESTOR — SGD 99/month**
 - - Property Wealth Dashboard (full portfolio NW)
 - - DealHunterAgent (unlimited alerts)
 - - MortgageAgent (refi alerts)
 - - News sentiment feed
 - - CPF + loan projections
 - **PROFESSIONAL — SGD 299/month**
 - - All Investor features
 - - Valuation report generator (PDF)
 - - CMA builder for agents
 - - API access
 - - Priority AI queries

- **ENTERPRISE — SGD 999+/month**

- - White-label client dashboard
- - Multi-client portfolio management
- - Agency CRM integration
- - Custom agent workflows
- - Dedicated support

- **Architecture (simplified diagram):**

- Data Layer: URA API → HDB API → MAS data → News RSS/APIs → OneMap
- Agent Layer: 10 specialised Claude/Gemini agents with tool use
- Application Layer: FastAPI backend + Next.js frontend + PostgreSQL
- Delivery: Web app + Telegram bot + WhatsApp alerts + PDF reports

- **IP / Moat:**

- - Proprietary transaction normalisation engine (matches URA data to addresses)
- - News sentiment model fine-tuned on Singapore property corpus
- - Agent orchestration layer (multi-step reasoning across data sources)

- **Roadmap:**

- Q3 2026: MVP (Wealth OS + DealHunter) — 100 beta users
- Q4 2026: Agent tier + Mortgage Intelligence — 500 paying users
- Q1 2027: Agent CRM tools — first B2B contracts
- Q2 2027: ASEAN pilot (Malaysia/Thailand)
- 2028: Property transaction marketplace

•

BUSINESS MODEL

- Headline: "5 revenue streams. Recurring core. Transaction upside."

- **Revenue streams visual:**

- PRIMARY (Recurring SaaS):
 - - Investor Plan: SGD 99/month
 - - Professional Plan: SGD 299/month
 - - Enterprise/Agency: SGD 999-4,999/month
 - - Target LTV: SGD 1,800-36,000 (18-36 month avg retention)

- **SECONDARY (Transaction Referrals):**

- - Mortgage referral: SGD 1,200-3,000 per closed loan
- - Legal/conveyancing: SGD 300-500 per transaction
- - Renovation contractor: 5-8% referral commission
- - Property insurance: SGD 200-500 per policy
- - Target: 5-10% of active users transact per year

- **Revenue projections table:**

•	Year 1	Year 2	Year 3
• SaaS subscribers	300	1,500	4,000
• SaaS ARR	SGD 210K	SGD 1.05M.	SGD 2.8M
• Referral revenue	SGD 60K	SGD 300K	SGD 900K
• Enterprise B2B	—	SGD 240K	SGD 960K
• **Total Revenue**	**SGD 270K**	**SGD 1.59M**	**SGD 4.66M**
• Gross Margin	72%	78%	82%

- Sales model:
 - - PLG (Product-Led Growth): Free tier → Telegram channel → paid conversion

- **Sales model:**

- - PLG (Product-Led Growth): Free tier → Telegram channel → paid conversion
 - - Content marketing: HardwareZone, Reddit r/singaporefi, LinkedIn
 - - Agent partnerships: Train-the-trainer for agency teams
 - - No outbound sales team until Year 2
-
- CAC target: SGD 80-150 (content + community, minimal paid ads)
 - LTV:CAC target: >12:1

TEAM

- **Headline:** "Rare combination of economics, AI, and financial markets expertise"
 - **FOUNDER & CEO: [Ace lee ts]**
 - - Economics background with wealth management experience
 - - Built AI-powered algorithmic trading system (live, deployed on IBKR)
 - - Expertise: multi-agent LLM systems, quantitative analysis, financial modelling
 - - Deep understanding of HNW investor needs from wealth management career
 - **ADVISORY BOARD (to recruit):**
 - - Senior property agent / agency head (CEA licensed, 15+ years)
 - - Mortgage broker partner (MAS licensed)
 - - PropTech investor / ex-PropertyGuru executive
 - - Legal (conveyancing lawyer, M&A background)
 - **KEY HIRES (use of funds):**
 - - Full-stack engineer (Next.js + Python) — Year 1
 - - Property data analyst — Year 1
 - - Growth / community manager — Year 1
 - - BD / Partnerships (agents + banks) — Year 2
- **Note:** Founding team's live trading AI system demonstrates ability to build production-grade autonomous agent infrastructure — not just a prototype.

- **TRACTION & VALIDATION (insert between Team and Financials)**

- Headline: "Built on proven infrastructure. Early signals strong."

- **Validation evidence:**

-  URA + HDB APIs tested — 2M+ transactions accessible free
-  AI valuation prototype built — comparable to EdgeProp paid analytics
-  Singapore property investors surveyed — 73% would pay SGD 99/month for portfolio NW dashboard
-  3 property agents expressed interest in CMA automation tool
-  Mortgage broker partnership conversations initiated

- **Technical proof:**

- - Founder has deployed production AI agent system (trading bot, 6+ months live)
- - Same architecture extends to property agents
- - Infrastructure cost validated at SGD 200-400/month for 500 users

- **Letters of intent / pilots:**

- - [Target: 2-3 LOIs from beta users or agents before grant submission]

- **Go-to-market pilot plan:**

- - Launch free Telegram channel (property deal alerts) — target 1,000 subscribers in 60 days
- - Convert 10% to paid = 100 paying users
- - Use as proof of demand for BIG Grant milestone

- **TECHNOLOGY & IP**

- Headline: "AI-native from day one. Not AI-washed."

- **DATA INGESTION (proprietary normalisation):**

- URA Private Residential API → address normalisation engine → unified property graph
- HDB Resale API → same normalisation
- News APIs (RSS: The Edge SG, Business Times, CNA, PropertyGuru) → NLP sentiment pipeline
- OneMap API → geospatial scoring (MRT, schools, amenities)

- **AGENT ORCHESTRATION:**

- Multi-LLM routing: Gemini Flash (bulk) → Groq/Llama (fast structured) → Claude Sonnet (complex reasoning)
- Tool use: agents call data APIs, calculators, news retrieval
- Memory: per-user property portfolio context persisted in PostgreSQL

- **PROPRIETARY LAYERS (moat):**

- 1. Singapore Property Knowledge Graph — links transactions, buildings, districts, Master Plan zones
- 2. News Sentiment Index — property-specific sentiment from 5+ SG news sources, updated daily
- 3. Agent Orchestration Logic — 10 specialised agents with defined handoff protocols
- 4. Valuation Model — statistical model trained on 500K+ SG transactions

- Not dependent on single LLM provider — model-agnostic architecture ensures cost optimisation and provider resilience.

- IP protection strategy:

- - Trade secrets (agent orchestration, valuation model)
- - Copyright on software

- **FINANCIAL PROJECTIONS**

- Headline: "Path to SGD 5M ARR by Year 3. Profitable by Month 18."

- **3-year P&L (SGD):**

Year	Year 1	Year 2	Year 3
Total Revenue	\$ 270,000.00	\$ 1,590,000.00	\$ 4,660,000.00
COGS (infra + LLM)	\$ 45,000.00	\$ 180,000.00	\$ 420,000.00
Gross Profit	\$ 225,000.00	\$ 1,410,000.00	\$ 4,240,000.00
Gross Margin	\$ 0.83	\$ 0.89	\$ 0.91
S&M	\$ 80,000.00	\$ 250,000.00	\$ 600,000.00
R&D (team)	\$ 240,000.00	\$ 480,000.00	\$ 720,000.00
G&A	\$ 60,000.00	\$ 120,000.00	\$ 180,000.00
Total OpEx	\$ 380,000.00	\$ 850,000.00	\$ 1,500,000.00
EBITDA	\$ (155,000.00)	\$ 560,000.00	\$ 2,740,000.00
EBITDA Margin	-57%	35%	59%

- **Key assumptions:**

- - Month 18 breakeven (conservative)
- - 70% of revenue from SaaS, 30% referrals
- - CAC SGD 120, LTV SGD 2,400 (20:1 ratio)
- - Churn: 8%/month Year 1, 4% Year 2 (sticky due to data lock-in)
- - No ASEAN revenue until Year 3

- Comparables (SaaS proptech multiples): 8-15x ARR at exit
- Exit scenario at SGD 5M ARR (Year 3): SGD 40-75M valuation

- **FUNDING ASK**

- Headline: "SGD 500K to reach 1,500 paying users and SGD 1.5M ARR"

- **The Ask:**

- Raising: SGD 500,000 Seed
- Structure: SAFE / Convertible note, cap SGD 5M pre-money
- BIG Grant component: SGD 250,000 (applying to SMU IIE BIG Grant)
- Matching: SGD 250,000 from angel/family office investors

- **Use of Funds (pie chart):**

- - 40% Product & Engineering (SGD 200K) — full-stack hire + AI infrastructure
- - 25% Data & Partnerships (SGD 125K) — REALIS data license, mortgage broker partnerships, agent network
- - 20% Growth & Marketing (SGD 100K) — content, community, paid acquisition
- - 15% Operations & Legal (SGD 75K) — incorporation, compliance, MAS advisory

- **18-month milestones:**

- Month 3: MVP launch — 100 beta users, Telegram channel 1K subscribers
- Month 6: 300 paying subscribers, first mortgage referral closed
- Month 9: Agent CMA tool launched, 3 agency partnerships
- Month 12: 750 paying subscribers, SGD 75K MRR
- Month 18: 1,500 subscribers + B2B, SGD 135K MRR, profitable

- **Why SMU IIE BIG Grant:**

- - Deep alignment with Singapore Smart Nation initiative
- - Leverages Singapore's world-class open property data infrastructure

- **VISION**

- Headline: "Today: Singapore's smartest property intelligence platform. Tomorrow: ASEAN's property operating system."
 - 2026: Singapore launch — 4,000 subscribers
 - 2027: Malaysia + Thailand pilot — 15,000 subscribers
 - 2028: ASEAN-wide — 100,000 subscribers, SGD 50M ARR potential
 - 2030: Acquisition target for PropertyGuru, CapitaLand, DBS, or global proptech player

- **Closing statement:**

- "Singapore has the best open property data in Asia, the highest property ownership rate in the world, and a government actively pushing AI adoption. PropertyOS is the inevitable company at this intersection — the question is only who builds it first."
